

Tips for using the **C.R.A.I.G** system

The content that is on your **Resume**, in your **portfolio projects**, and that will form the basis of your answers in **interviews** are not that different.

They are all part of **one representation** of you and the work you've done.

C.R.A.I.G is a simple but effective system that will help you remember, deliver, and showcase your work and your skills in a logical, free-flowing narrative across all aspects of the hiring process.

C > CONTEXT
R > ROLES
A > ACTIONS
I > IMPACT
G > GROWTH

CONTEXT

- **What** was the task?
- **Where** did the task come from?
- **Why** did it need to be solved?
- What was the **aim** of the project?

[1] What was the task?

CONTEXT

[3] Why did it need to be solved?

[2] Where did the task come from?

"[1] I worked on a customer churn project while at company x. [2] I'd initially run some analysis showing that the business was losing customers at an accelerating rate, month-on-month [3] and this appeared to be having a large impact on company revenue. [4] We wanted to both quickly understand which types of customers were leaving, as well as see if the data could show up any specific motivation for these losses. From there we could put in place an effective & targeted customer retention programme"

[4] What was the aim of the project?

ROLES

What YOU were
responsible for

What OTHERS were
responsible for

>> Did you need to support others with their tasks? How did you do this effectively?

ACTIONS

- Start with **everything** you can remember, and **refine** down to a logical narrative
- **Don't** just think about the **final** solution - what other tools & techniques did you **consider** and why did they not work?
- What **problems** did you face along the way, and how did you **overcome** them?

*>> Overall, look to showcase a problem solving **system** - one that could be applied to **any** problem that was put in front of you!*

IMPACT

- What was the **result** of your work?
- Use **tangible** figures where possible!

>> Did it help the business make faster/better decisions - where was it utilised?
>> Did it drive revenue - how much, and over what time period?
>> Did it reduce costs, or resource - how much, and over what time period?
>> Did it make the customer experience better - how can you quantify that?

GROWTH

*“If I was to start this project again now
(or if I had more time)...*

...what would I do differently?”

*>> This could be something technical OR something more akin to softer skills.
If it would have been beneficial to the overall project then it's a good point to
document or speak about!*

RESUME

For each project you list on your Resume, include 3 sentences:

Sentence 1: What the problem/task was [CONTEXT]

Sentence 2: What you did [ACTIONS]

Sentence 3: What the result was [IMPACT]

PROJECT

For each project in your portfolio, include 4 sections:

Section 1: [CONTEXT] (*What, Where, Why, Aim*)

Section 2: [ACTIONS] (*Include decisions & justifications!*)

Section 3: [IMPACT] (*Tangible figures where possible!*)

Section 4: [GROWTH] (*"If I had more time..."*)

INTERVIEW

Document each past project using C.R.A.I.G

Practice speaking through this **out-loud** - this helps you get the words out right when you're in the hot seat!

>> You won't necessarily get to speak through everything in full - but you may end up using parts of your preparation to answer a variety of questions!
